

AMERICAN SOIL TECHNOLOGIES, INC.

TURF MANAGEMENT WITH THE NUTRIMOIST® SYSTEM

Step One

Inject Nutrimoist® L and Soil Therapy™ into your fairways at recommended rates with the M216 polymer injector machine. Monitor your soil moisture and water accordingly.

Step Two

Apply Soil Medic™ to your fairways and greens at the recommended rates.

Step Three

Apply Anchor MP™ as needed to increase infiltration and reduce erosion.

Step Four

Apply Nutrimoist® H-2.5 on a quarterly basis to reduce the salt content of the soil and increase infiltration.

Always read and follow label directions before buying or using this product. The program outlined above is a general recommendation. Your specific turf and water management needs may vary. Consult your American Soil Technologies representative for specific recommendations.
