

AGRIBLEND[®]

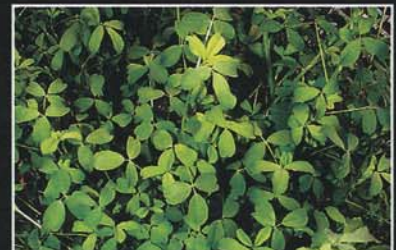

A WATER & NUTRIENT MANAGEMENT TOOL FOR TODAY'S GROWER

- CREATES A SEMI-PERMEABLE BARRIER IN SOIL
- ECONOMICAL APPLICATION AT 20-30 LBS PER ACRE
- INCREASES CROP YIELD 15%-35%
- INCREASES QUALITY OF CROP
- OPTIMUM BENEFITS FOR 3-5 YEARS
- REDUCES LEACHING AND EVAPORATION
- REDUCES SOIL COMPACTION
- REDUCES IRRIGATION 30% 50%

DRAMATIC YIELD INCREASES

DOCUMENTED YIELD INCREASE GENERATED BY AGRIBLEND PLUS ON 15,000 ACRES NATIONWIDE

AGRIBLEND®

AGRIBLEND improves germination and increases yield by holding applied moisture and chemicals in the root zone. **AGRIBLEND** reduces leaching and compaction in both sandy and clay soils. Overall crop production costs are lower due to savings in chemical applications and reduced water requirements. **AGRIBLEND** remains in the soil producing optimum results for 3 to 5 years, depending on method of tillage and method of application.

APPLICATION INSTRUCTIONS

BROADCAST METHOD: The BROADCAST METHOD of application is suitable with all crops and will give optimum benefits for 3 to 5 years with minimum till farming. Apply **AGRIBLEND** by broadcasting evenly to dry soil surface. The application rate will vary depending upon the type of soil. Immediately after broadcasting, and prior to planting till into top 3" to 6" of soil.

RECOMMENDED APPLICATION RATES:

SANDY SOILS: 30 lbs. to 35 lbs. per Acre

CLAY SOILS: 20 lbs. to 25 lbs. per Acre

BANDING: Banding is especially effective for improving early germination. Apply **AGRIBLEND** by banding over the seed row at time of planting. Apply in a 5" to 10" band and lightly till over surface of seed row. The BANDING METHOD requires reapplication every year.

RECOMMENDED APPLICATION RATES:

SANDY SOILS: 9 lbs. to 12 lbs. per acre

CLAY SOILS: 8 lbs. to 10 lbs. per acre

STORAGE & HANDLING

AGRIBLEND is non-toxic and may be stored in any cool, dry location. The product is very slippery when wet. Recommended sweeping or vacuuming any spilled product.
