

# **AGRIBLEND**<sup>®</sup> **AGRICULTURE BLEND**

A BLEND OF SUPER-ABSORBENT  
POLYACRYLAMIDE/ACRYLATE COPOLYMER &  
ZEOLITE

(PATENTS #5,649,495 and #5,868,087)

Active Ingredients  
40% POLYACRYLAMIDE/ACRYLATE COPOLYMER  
60% ZEOLITE

**NONPLANT FOOD INGREDIENT**

**WATER & CHEMICAL  
MANAGEMENT  
FOR**

**TODAY'S GROWER  
IMPROVES GERMINATION, INCREASES YEILD,  
REDUCES LEACHING AND EVAPORATION**

THIS PRODUCT HAS BEEN DETERMINED TO BE NON-HAZARDOUS IN  
ACCORDANCE WITH THE 29CFR 1910.1200 (OSHA HAZARD COMMUNICATION  
STANDARD). HANDLE AND USE THIS PRODUCT IN ACCORDANCE WITH GOOD  
INDUSTRIAL HYGIENE AND SAFTEY PRACTICES.

**Net Weight: 50 LBS. (22.68 kg)**

# **AGRIBLEND**<sup>®</sup> **AGRICULTURE BLEND**

## **PRODUCT INFORMATION**

**AGRIBLEND**<sup>®</sup> improves germination and increases yield by holding applied moisture and chemicals in the root zone. AGRIBELND reduces leaching and compaction both sandy and clay soils. Overall crop production costs are lower due to the savings in chemical application and reduced water requirements. It remains active in the soil producing optimum results for 3 to 5 years, depending on method of tillage and method of application.

## **APPLICATION INFORMATION:**

**BROADCAST METHOD:** Apply by broadcasting evenly to dry soil surface. The application rate will vary depending upon type of soil. Immediately after broadcasting blend into top 3" to 6" of soil with final field dressing prior to planting. The Broadcast method of application is suitable with all crops and will give optimum benefits for 3 to 5 years with no till and minimum till farming. If deep plowing is used, re-apply every second year.

## **RECOMMENDED APPLICATION RATES:**

SANDY SOILS: 30 lbs. to 35 lbs. Per Acre

CLAY SOILS: 20 lbs. to 25 lbs. Per Acre

**BANDING:** Apply by banding into the seed row at time of planting. Apply in a 5" to 10" band and lightly till into the surface of seed row. Banding is especially effective for improving early germination. The Banding method requires re-application every year.

## **RECOMMENDED APPLICATION RATE:**

SANDY SOILS: 9 lbs. to 12 lbs. Per Acre

CLAY SOILS: 8 lbs. to 10 lbs. Per Acre

## **STORAGE & HANDLING:**

**AGRIBLEND**<sup>®</sup> is non-toxic and can be stored in any cool dry location. Product is very slippery when wet. Recommend sweeping or vacuuming from floors any spilled product. If product is not used as specifically directed, or by the recommended application rates, user may not experience results stated, and could experience negative results.
