

NUTRIMOIST® L

By American Soil Technologies, Inc.

NUTRIMOIST® L is a blend of potassium-based cross linked polymers and inert hydration reagent specifically formulated for liquid injection into turf. Nutrimoist® L is safe to handle and will eventually break down into base component parts of ammonia, carbon dioxide and water which can help stimulate biological activity.

To Be Used With An ASTI Approved Fertilizer Program

ACTIVE INGREDIENT
23 % Potassium Acrylate / Acrylamide
Copolymer, Crosslinked

All ingredients are exempt from the requirements or a tolerance as specified in 40 CFR 180.1001,c.

NOT A PLANT FOOD INGREDIENT

***TO BE INJECTED INTO THE SOIL AND USED WITH
AN APPROVED ASTI FERTILIZER PROGRAM***

Directions for Use

>**General Use** – Slowly add 1 lbs. Nutrimoist® L per gallon of water while circulating the water. Inject at rate of 255 gallons of Nutrimoist® L and water mixture per acre.

>**Compatibility** – NUTRIMOIST® L is compatible with most commonly used fertilizers, pesticides and plant nutrients used in turf maintenance. However, user assumes sole responsibility for non-phytotoxic compatibility with turf maintenance products. If in doubt, perform a jar compatibility test or consult an expert in polymer compatibility.

Information – NUTRIMOIST® L was developed as a Soil Conditioner designed for injection into the soil to reduce water usage and increase the efficiency of applied nutrients.

Notice to Buyer - Seller makes no warranty, expressed or implied concerning the use of this product other than as indicated on this label. Buyer assumes all risks of use or handling.

CAUTION: Do not inhale dust. Do not ingest. Do not get into eyes. Avoid prolonged or repeated skin contact. In case of contact, immediately flush with water. Avoid further contact. **Spill or Leak:** non-toxic biodegradable material. Avoid contact with water as extremely slippery condition will result.
