

AMERICAN SOIL TECHNOLOGIES, INC.

NUTRIMOIST® H-2.5

NUTRIMOIST® H-2.5 is a soil conditioner designed to aid in water infiltration. It may be of benefit during periods when plants are starved for food and/or water.

BUFFERS SOIL PH, REDUCES SALT BUILDUP

Nutrismoist H-2.5 is an organic-acid liquid formulation, of acetic, citric and humic acid derivative blends. It has a pH of less than 2.5, which can help buffer high pH and sodic soil conditions. This product is not a fertilizer. Rather, Nutrismoist H-2.5 should be used in conjunction with a regular fertilizer program.

BENEFITS DRIP SYSTEMS

The organic acid formulation is ideal for helping to clean drip systems. Regular use can help remove buildup that can impair drip system performance.

BIOLOGICALLY COMPATIBLE

Nutrismoist H-2.5 is safe to handle and does not burn. After 90 days, it will break down naturally, leaving short chain sugar carbons which can help stimulate biological activity in the soil.

HOW TO USE

Apply 10-30 gallons per acre, two to three times during the growing season. NUTRIMOIST H-2.5 is compatible with most commonly used pesticides and plant nutrients. Test for non-phytotoxic compatibility before using a large volume or over a large area. If in doubt, perform a jar compatibility test or consult an expert in spray crop compatibility.
